- MLS (Mayan Living Space)# JAS1:27

Bridge of Hope was founded in 2005 to continue work in the mountain villages of the Ixil Triangle of central Guatemala.

\$450

builds a 12'x12' timber house with a corrugated roof for a family.

In the last 6 years Bridge of Hope has provided daily nutrition and Bible education to 80 children in the village of Chisis, built nearly 90 houses in 6 villages, and invested in micro-economics to foster self-sustaining environments.

With your help Bridge of Hope can continue to restore this desperate and impoverished region. Each home will shelter up to six people, and sometimes multiple families until Bridge of Hope returns to build the remaining homes needed in a village.
